WORK EXPERIENCE

Flexa GmbH | Munich, Germany
Software Engineer — June 2026 - Present
Optimization & Trading Team focusing on VPP Optimization and Energy Markets.

- Cut the runtime of the optimization cycle by 45%.
- Built a bias-correction system for household PV generation forecasts, correcting 300+ MWh of forecast error per month.
- Built one-click deployment and CI test infrastructure (smoke tests, mock market interfaces, scenario-driven end-to-end tests, ephemeral stacks), cutting 20+ minutes per deployment and raising deployment frequency 5x.
- Onboarded the first customer tenants onto Flexa's VPP cluster and built a reusable onboarding framework.

Unacademy | Bengaluru, India
Senior Software Engineer — April 2023 - April 2024
Grew NextLevel, Unacademy's gamified job platform with live games, to 1M+ users and 10,000+ daily active users.

- Designed a scalable event-synchronization pipeline from Amplitude to WebEngage on AWS Kinesis, powering the targeted marketing campaigns behind that growth.
- Led development of an in-house recruiter-candidate chat service that replaced StreamIO, saving $100,000 per year.
- Implemented the Glicko rating system in Go for live player ratings and rankings, scaled to 25,000 concurrent matches.
- Conducted 25+ interviews to build a 15-engineer team; mentored 5+ software engineers.

Software Engineer (Founding Engineer) — January 2022 - April 2023

- Built a Go WebSocket service serving 100,000+ concurrent connections with zero downtime over 2+ years.
- Built an AI proctoring tool for Relevel, Unacademy's job platform, with face recognition and object detection (YOLOv8), cutting costs by $150,000 per year.
- Led engineering as NextLevel's founding engineer and personally built its 3 core distributed microservices.

Cohesity | Bengaluru, India
Site Reliability Engineer (SRE) — August 2020 - January 2022

- Automated VM provisioning on VMware ESXi with PowerShell, saving a 20+ engineer team about an hour per cluster build.
- Wrote Python tooling for cluster login, health checks, diagnostics and auto-fixes of common failures on distributed systems, speeding up debugging.

Samsung R&D Institute | Bengaluru, India
Software Research Intern — August 2019 - January 2020

- Implemented the TextBoxes++ CNN text detector on-device with TensorFlow Lite for fast, offline mobile text detection.

EDUCATION

University of Southern California | Los Angeles, United States — August 2024 - May 2026
Master of Science in Computer Science | **GPA: 3.96/4**

- **Courses**: Analysis of Algorithms, Database Systems, Multimedia Systems Design, Advanced Mobile Devices and Game Consoles

BMS College of Engineering | Bengaluru, India — August 2016 - August 2020
Bachelor of Engineering in Computer Science and Engineering | **GPA: 9.31/10**

- **Courses**: Algorithms & Data Structures, Computer Networks, Operating Systems, Neural Networks, Internet of Things

SKILLS

Languages: Python, Go, C++, Java, JavaScript, Swift, SQL
Frameworks: Django, Flask, Node.js, Angular, Celery, Pandas, NumPy
Streaming & data: Websockets, Kafka, Apache Flink, AWS Kinesis, Redis Pub/Sub
Databases: PostgreSQL, MongoDB, DynamoDB, Redshift, ClickHouse, ElastiCache, DocumentDB
Cloud & infra: AWS (EC2, ECS, ECR, OpenSearch, CloudWatch, CodePipeline), GCP, Azure, Docker, Kubernetes, GitHub Actions

ACHIEVEMENTS

- Rank #1 at State level in Mathematics and Physics in the 12th-grade State Examinations.
- Awarded Best Project in Computer Science (2020), chosen from among 300 students.
- Published two Research Papers: Smart Surveillance Tool, Annotation for Object Detection
