Turn Ideas Into Trades

PROBLEM

- Around 90% of Stock Market Traders are in Loss[1][2]

WHY?

- We believe this is from a lack of access to risk-free testing & learning
- Retail traders are likely to invest based on emotions or social media trends

SOLUTION

- A single platform to discover trading opportunities, backtest strategies, paper trade, and seamlessly move to live execution
- With AI support at every step, answering questions, simplifying market insights and converting ideas into trading algorithms, coder or not

How it Works

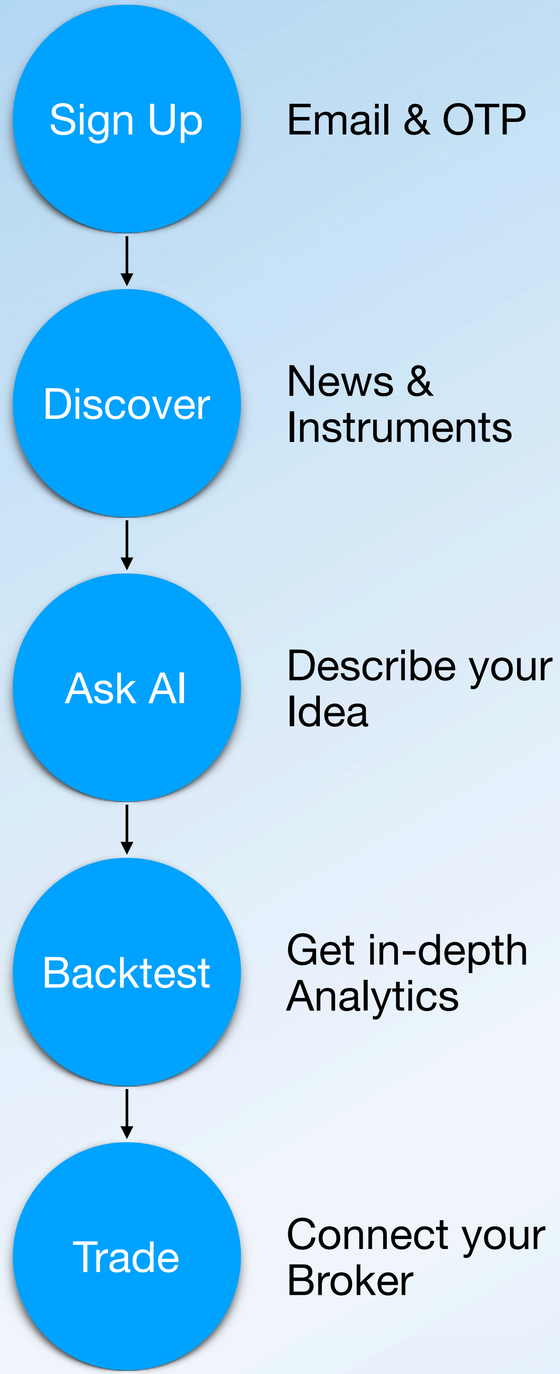

1. Sign Up & start your Discovery by searching the News or talking to our AI

2. Once you have a Strategy you want to implement, describe this idea to our AI and let it generate all the required code to get you started

3. Backtest this Strategy on select instruments or upload your own data to Backtest

4. Connect your Broker & start Trading

5. All on ONE platform

WHY NOW?

- Just as Cursor and Lovable showed that anyone can build software without coding, Zhuhana aims to do the same for retail trading by making algorithmic trading accessible to everyone
- The number of people trading equity has more than doubled in the past 15 years around the world[1][2][3]
- Algorithm Trading has seen changes in regulation[4] in India to increase trust and has also seen an increased adoption in the US & Asian markets[5][6]

MARKET

- The Algorithmic Trading industry represents a $21 - $51B market opportunity, growing rapidly at 8% - 12% CAGR
- Our target users are younger investors (under 40) who embrace AI tools and are already experimenting with them, making them natural adopters of our platform
- **TAM**: $15 Billion
- **SAM**: $6 Billion
